NoSQL - Wikipedia

SQL (structured query language) is a domain-specific language designed for managing data held in a relational database management system (RDBMS) or for stream processing. It is characterized by a collection of statements that are used to create and define the database structure, to insert, delete, and update data, and to retrieve data from the database. It is a declarative language, meaning that the user specifies what data to retrieve or to change, rather than how to do it.
