"Edda" (/ ɛː d̥ɑː /; Old Norse Edda, plural Eddur) is an Old Norse term that has been attributed by modern scholars to the collective of two Medieval Icelandic literary works: what is now known as the Prose Edda and an older collection of poems without an original title now known as the Poetic Edda.

Poetry (the term derives from a variant of the Greek term, poiesis, "making") is a form of literature that uses aesthetic and rhythmic qualities of language—such as phonaesthetics, sound symbolism, and metre—to evoke meanings in addition to, or in place of, the prosaic ostensible meaning.
