Algebraic dual space. Given any vector space V over a field F , the (algebraic) dual space V^* (alternatively denoted by V' or V^{\vee}) is defined as the set of all linear maps $f: V \rightarrow F$ (linear functionals).

Feature-wise transformations in the literature. Feature-wise transformations find their way into methods applied to many problem settings, but because of their simplicity, their effectiveness is seldom highlighted in lieu of other novel research contributions.

Feature-wise transformations - distill.pub

Abstract: We consider an attraction-repulsion chemotaxis model coupled with the Navier-Stokes system. This model describes the interaction between a type of cells (e.g., bacteria), which proliferate following a logistic law, and two chemical signals produced by the cells themselves that degraded at a constant rate.
